

## Good/Bad/Ugly Assignment

Data Visualization Using R  
Spring 2018

### The Basics

- If you are signed up for week 2, send me a picture or link of a graphic by Monday at 9 am. Likewise for all future weeks
- Find a graphic that you like or dislike
- Come prepared to discuss why you think it's successful or not
- If we've discussed a particular type of graphic in the previous class, it is helpful (but not required) for it to be the same type of graphic
- No slides required
- We will sign up this class and I'll post assignments on the webpage
